Experience

Pobl Tech | Full Stack Developer

Nov-2023 - Present

- Delivered features across 10+ web and mobile projects from design through to development, testing and deployment.
- Developed applications using React, JavaScript and TypeScript, working across PHP backends, APIs and SQL databases.
- Built and maintained serverless functionality using Cloudflare Workers, including API integrations and backend logic.
- Contributed to mobile applications and worked with WordPress, Shopify and third-party integrations.
- Carried out functional, regression, integration and cross-device testing, with some Jest testing.
- Supported live applications by troubleshooting issues and delivering ongoing improvements.

Revolent | GCP Cloud Engineer

May 2023– Nov 2023

- Completed practical cloud and DevOps projects using Google Cloud Platform, Google Kubernetes Engine, Docker and Terraform.
- Deployed and troubleshot cloud-based applications using infrastructure-as-code and containerisation concepts.
- Worked with React and Next.js applications as part of cloud development projects.
- Gained experience with cloud infrastructure, deployment workflows and Kubernetes environments.

JBS Capacitors | Assistant Software Engineer

May 2022 – Dec 2022

- Developed React and React Native features for web and mobile applications.
- Used Python in AI and computer-vision projects.
- Built a newsletter sign-up system and improved the user flow through testing and iteration.
- Worked in an agile environment, contributing to debugging and delivery.

Projects

GoGrow | [Website](#)

- Built and maintained a web platform and iOS application, working across application development, API integration, testing, deployment and ongoing improvements.

Viralz app | [Website](#)

- Developed and launched an AI-powered SaaS platform with Stripe payments and Google OAuth authentication, reaching approximately £1,000 in monthly revenue.

Personal Website | [Website](#)

- Designed and developed a responsive portfolio website to showcase software projects.

Snappd | [Website](#)

- Built a digital scrapbook for my own wedding, allowing guests to share photos and memories. Managed development, testing and deployment.
